WATERBORNE – THE RFF135 MEGA YACHT

Porsche Design Group (Porsche Lizenz- und Handelsgesellschaft mbH & Co. KG) and the Singapore-based yacht builder, Royal Falcon Fleet, have joined forces in order to design and produce luxury catamarans and mega yachts.

The initial collaborative project will be to design a motor catamaran, over 40 metres (135 feet) in length, to be sold under the Royal Falcon Fleet brand. Porsche Design will design both the exterior superstructure and the interior of the mega yacht. Royal Falcon Fleet has engaged Kockums and Incat Crowther for the engineering and the naval architect of the project. Kockums, a subsidiary of ThyssenKrupp based in Sweden, is renowned for its cutting-edge technology in the field of marine engineering. Incat Crowther is a naval architect based in Australia with decades of experience in the construction of large motor catamarans.

Singapore-based, Royal Falcon Fleet, was established by a Swedish investor and is committed to build a premium brand in the mega yacht industry. With cutting-edge design, world-leading technology and state-of-the-art engineering, complemented by beautifully crafted European interiors, Royal Falcon Fleet is set to redefine the meaning of ultimate luxury cruising.

Porsche Design Group, based in Stuttgart, Germany, is a majority-owned subsidiary of Porsche AG, Stuttgart, Germany. The company's activities are focused on the brands, Porsche Design, Porsche Design, Driver's Selection and the Design Studio in Zell am See, Austria.
